

A MORE EFFICIENT WORKDAY FOR UTILITY MAINTENANCE PLANNERS AND SCHEDULERS

A day in the life of a utility maintenance planner is often fraught with frustration. They're frequently asked to complete non-value-added tasks on top of their regular responsibilities. This means proper planning and scheduling suffers, resulting in rushed and incomplete preparations, raising risks and costs. Digital maintenance planning and scheduling offers an effective solution that enables these key personnel to better focus on what's actually important when preparing for an outage or shutdown.

Let's take a closer look at how:

Streamlined Planning

Get rid of paper forms and checklists.

- Scope work
- Check parts availability
- Split work between multiple resources

Faster Scheduling

No more spreadsheets.

- Arrange for workers based on availability
- Schedule work over multiple weeks
- Set delivery dates against work orders

Instant Visibility

See everything as it happens.

- Number of jobs open
- Number of workers available
- Time taken to do a job

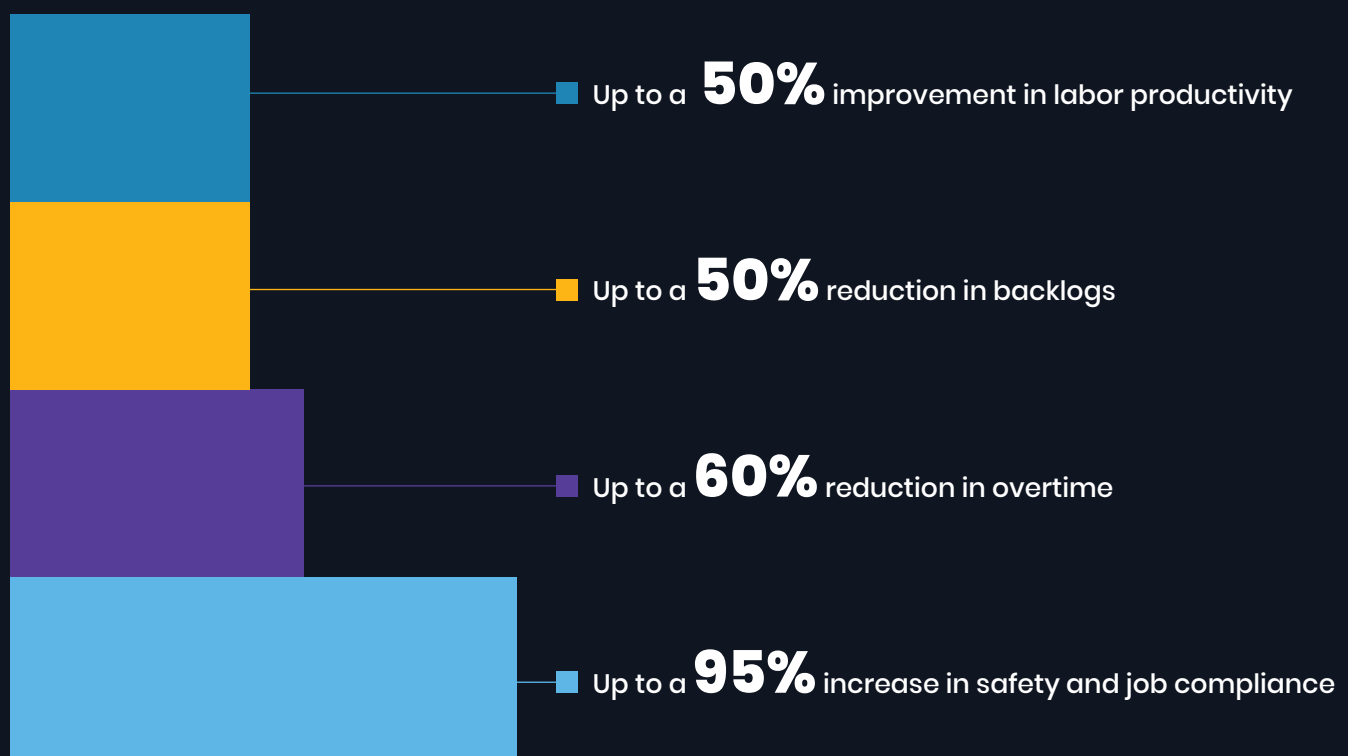

Real-Time Updates

Eliminate slow, tedious manual data entry.

- Automatically update job status to SAP
- Review schedule compliance
- Get updates on any mobile device or desktop app

Digital maintenance planning and scheduling offers many advantages to utility companies, such as:
