

A Chemical Giant's Connected Worker Transformation with Innovapptive

About Dupont

Industry:
Chemicals

Headquarters:
Wilmington, Delaware

Areas Served:
Global

2021 Revenue:
\$16.6 billion (U.S.)

Overview

DuPont (NYSE: DD) partnered with Innovapptive to digitally transform its maintenance and spare parts warehouse functions. With Innovapptive's mobile solutions, DuPont:

- Gained real-time inventory visibility
- Raised maintenance productivity
- Increased interdepartmental collaboration
- Boosted data value and accuracy
- Improved responsiveness and decision making

Business Drivers

A DuPont internal analysis revealed that several challenges were hindering the efficiency and effectiveness:

- Rampant information silos between maintenance and the warehouse
- No real-time maintenance visibility into spare parts inventory
- Slow work order execution because of waiting on parts
- Poor integration between the field and the back-office ERP

Why DuPont Chose Innovapptive

DuPont approached Innovapptive for a mobile solution to help it overcome its challenges and deliver greater collaboration between maintenance and the spare parts warehouse. Innovapptive's Connected Worker Platform offered DuPont many advantages:

- Easy configuration and customization
- Intuitive user interface and superior user experience
- Seamless integration with ERP systems
- Ability to work in online and offline modes
- Pre-packaged maintenance execution, work instructions, operator rounds, and inventory management applications

What Results Can Users Expect?

Innovapptive customers have reported up to:

26%

lower maintenance costs

30%

higher inventory accuracy

20%

greater wrench time

10%

less inventory carrying costs
