

**mInventory**  
Mobile Inventory Management

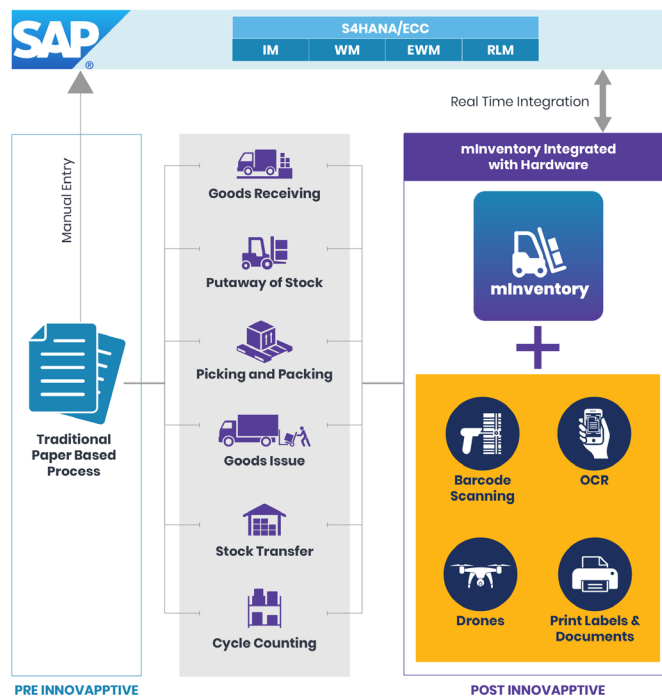

**SAP® Certified**  
Mobile App

SAP® Certified Mobile App – developed on an SAP Cloud Platform, works on SAP ECC and S/4HANA.

## mInventory – an Overview

Innovapptive's mInventory solution connects warehouse operations and SAP in real time, thus eliminating delay between physical movement of inventory and its recording in the system (like SAP), which leads to greater stock accuracy/visibility, warehouse staff productivity and data-driven decisions.

### Inventory & Warehouse Management Solutions

### Leverage mInventory to add value to your business

- **Role-based mobile screens** for warehouse operators, clerks, forklift drivers, etc.
- **Intuitive, easy to follow** workflows with touchscreen.
- **Customize mobile screens** to suit your business needs with patented low-code/no-code configuration technology.
- **Dynamic, app-based** directed picking – FIFO, Zones, etc.
- **Perform consignment audits** for compliance, lower carrying costs, and mitigate tax and insurance overpayments.
- **Eliminate paper**, error-prone count sheets and cumbersome Excel files.
- **Decrease downstream problems** in inventory and invoicing.
- **Get valuable insights** about the stock available within your plants, warehouses or storage locations, including batch-wide stock availability.
- **Generate timely** and relevant analytics.
- **Keep track of type of stocks** like unrestricted (ready for shipment), quality inspection (to control quality before shipment) or blocked (damaged stock).

### Benefits

**98%**

accuracy in physical and cycle counts

**30%**

greater inventory accuracy

**50%**

quicker inventory turns

**50%**

higher spare part turns

**35%**
