

Mobile Operator Rounds – Digital Maintenance and Safety Checklists

SAP® Certified Mobile App – works on SAP ECC and S/4HANA

Digitize Inspections, Boost Productivity and Improve Frontline Worker Safety

Mobile Operator Rounds solves slow, time-consuming paper-based equipment and safety inspection problems. Our easy-to-configure mobile and web apps simplify creating and executing rounds – deliver quick, thorough and accurate operational information to make real-time decisions. Empower operators and technicians to raise notifications for corrective action before an issue becomes catastrophic, resulting in a costly EHS incident or asset downtime.

Problems Solved

- Paper-based checklists and inspections
- Manual data collection, entry and storage
- Inaccurate data
- Time lag getting data to decision-makers
- Preventable failures/unplanned downtime
- Safety compliance
- Difficulty in maintaining historical data for audits

Features

- Eliminate error-prone paper count sheets and Excel spreadsheets
- Supports Android, iOS and Windows applications
- Runs on tablet devices, mobiles and desktops
- Utilizes native mobile device capabilities, such as GPS, camera and barcode readers
- Easy configuration and customization using no-code/low-code technology
- Intuitive, easy-to-follow workflows with touchscreens
- Works in Offline and Online modes
- Role-based mobile screens
- Integrates with and industry-standard barcode/QR code scanners, OCR, printers and hands-free devices
- Compatible with Bluetooth devices
- Integrates with work order management and work instruction software
- Easy-to-use UI and superior UX

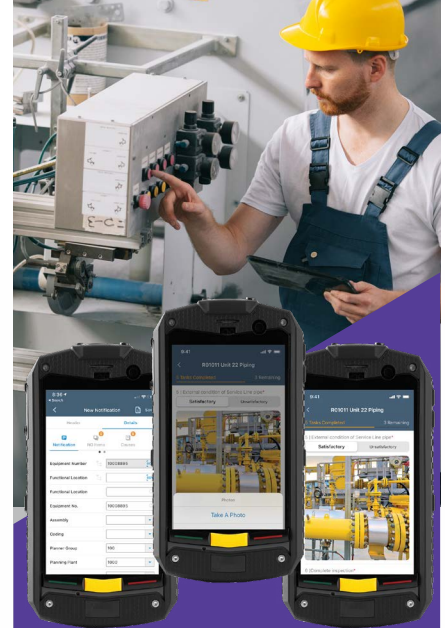

Functionalities

- Define round plans by adding, customizing and creating tasks
- Assign and manage tasks, crews and roles by shift and define their frequency
- Number of tasks and task progress indicated against each asset
- Monitor tasks – complete, incomplete or overdue
- Access equipment diagrams, asset hierarchy and historical data
- View rounds based on work orders or custom objects
- Record measurement points and create alerts when data is out of defined range
- Create notifications from point of measurement
- Capture and attach notes or pictures during or at the end of a round
- Attach work instructions and SOPs
- Mandatory tasks cannot be skipped without a note
- Review and reorder rounds
