Optimize Plant Maintenance Planning and Scheduling

Innovapptive's Visual Planner digitalizes maintenance work order planning and scheduling. Achieve maximum efficiency by eliminating paper-based processes, optimizing resource utilization, and maximizing the scoping, organizing and timing simple repairs to complex turnarounds — even emergency ones. Visual Planner extends asset lifespan and reliability, minimizes asset breakdowns, boosts safety compliance, and improves profitability. It's the only embedded SAP tool designed to support EPRI best practices guidelines.
.

Problems Solved

- Paper-based planning and scheduling
- Quickly address emergency work orders
- Unplanned downtime due to poor asset reliability
- Poor resource utilization and productivity
- Safety compliance
- Profitability

Features

- Eliminates paper forms, Excel files and manual data entry
